

HELP SAVE RNSH

The future of Royal North Shore Hospital (RNSH) and the long-term health of your community is in jeopardy.

The NSW Government is planning a long overdue upgrade of this major local, referral and teaching hospital that services 1 in 6 of the NSW population and 1 in 18 Australians.

The \$1 billion upgrade is a joint Public Private Partnership (PPP) between the NSW Government and InfraShore Consortium.

While in favour of the upgrade, the RNSH Medical Staff Council (MSC) has major concerns that the redevelopment is grossly under-funded, and that the plans do not address the current problems burdening the hospital, nor cater for the future needs of our growing population.

Three key areas of the plan will significantly compromise the hospital's future patient care and services:

1 Land sell-off

The sale of more than 50% of RNSH land (from 11.6 to 5.6 functional hectares) will stymie the potential for future hospital expansion and reduce the green open space within RNSH grounds.

2 Inadequate beds

The failure to provide adequate bed numbers to meet the current and future needs of our community.

3 Displaced services

The impractical relocation or omission of essential services, such as Mental Health, Women's and Children's, Pain Management and many more.

HELP SAVE RNSH

Would you sell your backyard to pay your household bills for only 3 months?

The plan to self-off RNSH land is a short-sighted, revenue-raising venture by the State Government that will stymie the future of healthcare in the Northern Sydney Local Health Network (NSLHN). The sold land will house high-rise residential and commercial buildings up to 33 storeys high. NSW Health plans to use the \$100 million profit from the land sale to pay a small portion of the RNSH redevelopment costs – equivalent to only 3 to 4 months running costs of the existing hospital.
